Kickoff Meeting will be held: Tuesday, Sept. 21st 6:30 - 8 pm

Location: Plant 12 building: 455 W Monroe Street, New Bremen, OH 45869

Crown Equipment Corporation is pleased to announce the return of Product Developments Exploring Post chapter! The program offers high school students the chance to learn life and career skills through immersive career experiences and mentorship, facilitated through the Engineering department at Crown. Meetings will occur once a month during the school year. At the meetings, students can expect to participate in activities such as hands-on engineering labs, tours of the Crown facilities, and presentations about career paths in engineering.

For any parents wishing to attend, we will have a separate presentation to discuss what to expect from the program while the students are meeting the committee. After the presentation, those students interested in participating can complete the registration application.

If you have any questions email: post.450@blackswampbsa.org
